WHEREAS the Parish of Bossier is threatened with an emergency condition within our parish due to the lack of rainfall, the past several months we have had dry conditions in our region, this has created dangerous fire conditions for Bossier Parish. Fires have already occurred where there have been property losses. According to the Weekly U.S Drought Monitor, a majority of Bossier Parish is in a D1- Moderate Drought conditions with the far North part of the Parish area is in a D0- Abnormally Dry conditions. With the current state of dryness / drought across the region and our parish, creating the very dry ground and vegetative conditions for the wildfire threat development. These conditions will remain and will likely get worse if we do not receive adequate rainfall in our area. This dryness along with any wind conditions will have a negative impact on our parish by the increased fire danger threat within Bossier Parish and surrounding areas.

WHEREAS, The Bossier Parish Fire Chief's agree, that there is a very definite threat possibility to life and property of the citizens of this Parish as well as first responders' safety issues; and requested the Burn Ban be in effect immediately for the entire Bossier Parish area beginning Friday January 2nd until these conditions improve and,
