

PERFORMING FEMA ELEVATION CERTIFICATE SURVEYS USING THE BOSSIER PARISH MONUMENT SYSTEM

For compliance with FEMA policy of Elevation Certificates being referenced to the NGS database, a comment needs to be added to all elevation certificates where a Bossier Parish Monument was used.

The NGS CORS station Shreveport CORS (PID is DG7396) was used in every observation. In Item C2 of the elevation certificate, in the comments line, a note needs to be added that the NGS Reference is DG7396. This is in addition to listing the Bossier Parish monument used for the survey. An example is attached.
